WASHINGTON 2006 WORLD PHILATELIC EXHIBITION

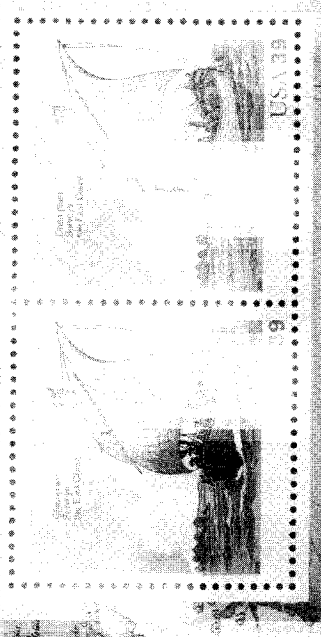

Le voyage de Samuel de Champlain

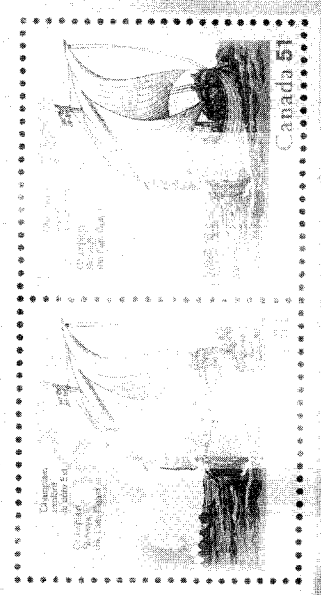

oyage de 1606 de Samuel de Champ

A skilled cartographer, Samuel de Champlain played a key role in French exploration of North America. In 1606, he served with a coastal expedition that began in what is now Nova Scotia and sailed as far south as modern-day Massachusetts.

Habile cartographe, Samuel de Champlain a joué un rôle clé dans l'exploration de l'Amérique du Nord au nom de la France. En 1606, il a participé à une expédition côtière, prenant la mer dans la région qui s'appelle aujourd'hui la Nouvelle-Écosse et naviguant loin au sud, jusque dans l'actuel Massachusetts.

GLOSSARY OF PHILATELIC TERMS

Approvals: Stamps sent to a collector for examination. Approvals must be bought or returned to the dealer within a specific time.

Block: An unsevered group of stamps at least two stamps wide and two stamps high.

Booklet Pane: A small pane of stamps especially printed and cut to be sold in booklets.

Cancellation: A mark placed on a stamp by a postal authority to prevent its reuse.

Cancellation to Order (CTO): Stamps which are cancelled by the postal authorities without being sent through the mails.

Coils: Stamps issued in rolls for use in affixing or vending machines.

Commemoratives: Stamps which honour anniversaries, important people, or special events. Commemoratives are usually sold for a specific length of time.

Condition: The state of a stamp in regard to centering, colour, freshness, cancellation, and other related characteristics.

Cover: The entire wrapping or envelope in which a letter has been sent through the mail.

Definitives: Regular issues of stamps as distinct from commemoratives.

Engraved: Stamps produced from steel plates into which the design has been inscribed. Lines on the face of engraved stamps are slightly raised, and when seen from the back are slightly depressed.

First Day Cover: A cover bearing a new stamp and cancelled on the first day of sale, usually at an officially designated location.

Gum: The adhesive on the back of an unused stamp.

Imperforate: Stamps without perforations. They must be separated with scissors and are usually collected in pairs to prove their authenticity.

Inverted Centre: A stamp with the centre printed upside down in relation to the rest of the design.

Laid Paper: Shows closely spaced alternate light and dark lines when held up to a light.

Overprint: Any word, inscription, or device placed on a stamp to alter its use or locality, or to serve a special purpose.

Pair: Two unsevered stamps.

Pane: A portion of the original sheet as cut for sale at the post offices.

Part-Perforate: A stamp which has perforations on one, two or three sides.

Perforations: Line of small cuts or holes placed between two rows of stamps to facilitate separation.

Plate Number Block: A block of stamps with sheet margin showing a plate number or numbers. Often it is known simply as a plate block.

Postal Stationery: Envelopes, postcards, wrappers, etc. which have non-adhesive stamps embossed or printed on them.

Postmark: A mark struck upon envelopes, generally to indicate the name of the post office, date of mailing, etc.

Precancels: Stamps with cancellations applied before the mailing of the article on which they prepay postage.

Provisionals: Stamps issued prior to the regular issues or to meet a temporary shortage of regular stamps.

Reissue: An official printing of a stamp, or stamps, that had been discontinued.

Rouletting: Short consecutive cuts in the paper between rows of stamps to facilitate separation.

Se-tenant: An unsevered pair of stamps which differ in value, design, or surcharge.

Sheet: Complete unseparated group of stamps as originally printed.

Surcharge: An overprint which alters or restates the face value or denomination of the stamp to which it is applied.

Unused: A stamp with or without original gum which has no cancellation or other evidence of postal duty.

Used: A stamp which has done postal duty as evidenced by the cancellation.

Watermark: A design or pattern incorporated into the paper during its manufacture.

Wove Paper: Has a smooth and even surface and shows no light and dark figures when held up to a light.
