International Polar Year
2007

*International Polar Year
2007-2008*

Continuing the tradition of international cooperation that began with the first IPY in 1882-1883, scientists from around the world will initiate a new era in polar research by participating in IPY 2007-2008. Working across many disciplines, they will conduct field observations, research, and analysis to build upon current knowledge and increase our understanding of the roles that both polar regions play in global processes.
